

MYKIN is a
collective universe.

We are artists creating
one-of-a-kind T-shirts
telling the stories of our
interwoven characters.
This network thrives
in the workflow and
process that binds us all
as creative visionaries.
Through hands-on
collaboration, MYKIN
was brought to life
with multiple stages
of production, and the
drive to make this world
real.

What

WHAT IS

The MYKIN brand started with a chalkboard. We narrowed down logos from 50+ options to 4. The concept is based in connectivity, networks, and unity. These ideas are conveyed through our finalized logos in four unique ways.
